

ASSET MANAGEMENT

We help companies with workspace transition and expansion - including tracking and managing assets - whether they're in storage, or in use.

Your single best resource for proven efficiency and experienced support:

- ❑ State-of-the-Art Technology, Warehouse and Storage Facilities
- ❑ Tiered, Climate-Controlled Storage with Management and Inventory Reporting Options
- ❑ Coordinate Repair and Refurbishing Services
- ❑ Convenient Web-Enabled Asset Monitoring and Management Software
- ❑ Pick-Up, Delivery and Multi-Location Shipping

RE-CONFIGURATION, EXPANSION, QUICK CHANGE, FULL-SCALE TRANSITION, WHATEVER IT TAKES.

We can develop an Asset Management Program to address your specific requirements. Whether you need to store, repair, refurbish, deploy or dispose of inventory, your A&M Project Manager can oversee any or every aspect of your asset management program.

COST-EFFECTIVE SERVICES

A&M Business Interiors provides industry-leading tracking tools and storage capabilities for a wide range of asset management services. Our convenient web-enabled tracking and management software provides customized reporting and analysis so you can better manage specific assets - either in use, or in storage.

EFFICIENT, ACCURATE AND ACCOUNTABLE

From cataloging furniture quantities, condition, availability and colors, to locating component parts and coordinating delivery, our asset management software uses bar code technology to capture important information that makes asset management fast, accurate and more efficient. Contact A&M and you can tap into any, or all of the Asset Management resources you need.

Working. In offices nationwide.
